### **(334111) -Technology Companies -- Manufacturing**

manufacturing and/or assembling electronic computers, such as mainframes, personal computers, workstations, laptops, and computer servers. computers can be analog, digital, or hybrid. digital computers, the most common type, are devices that do all of the following: (1) store the processing program or programs and the data immediately necessary for the execution of the program; (2) can be freely programmed in accordance with the requirements of the user; (3) perform arithmetical computations specified by the user; and (4) execute, without human intervention, a processing program that requires the computer to modify its execution by logical decision during the processing run. analog computers are capable of simulating mathematical models and contain at least analog, control, and programming elements. the manufacture of computers includes the assembly or integration of proce...

### **(541) -Technology Companies -- Service**

industries in the professional, scientific, and technical services subsector group establishments engaged in processes where human capital is the major input. these establishments make available the knowledge and skills of their employees, often on an assignment basis, where an individual or team is responsible for the delivery of services to the client. the individual industries of this subsector are defined on the basis of the particular expertise and training of the services provider. the distinguishing feature of the professional, scientific, and technical services subsector is the fact that most of the industries grouped in it have production processes that are almost wholly dependent on worker skills. in most of these industries, equipment and materials are not of major importance, unlike health care, for example, where "high tech" machines and materials are important collaborating inputs to labor skills in the production of he...
